2015 - 2016 Tax Credit Certification For Qualifying Cooling and Heating Systems

Purchasers of qualifying Mitsubishi Electric HVAC products:

The Protecting Americans from Tax Hikes Act of 2015 retroactively renewed the federal tax credit for homeowners who installed qualified high efficiency, energy saving products in their primary residence between January 1, 2015, and December 31, 2016. Any qualified cooling and heating system installed in 2015 or 2016 for a primary residence is eligible for this credit, subject to IRS regulations. If you have already claimed the maximum total tax credit of \$500 for purchases made in any previous year, you are ineligible for additional tax credits for any new HVAC equipment purchases.

An eligible taxpayer may claim up to \$300 in tax credits, subject to IRS limits based on the type of HVAC equipment installed, including:

- Up to 10% of installed costs (\$300 limit) for central split-system air conditioners meeting or exceeding 16 SEER and 13 EER.
- Up to 10% of installed costs (\$300 limit) for split-system air-source heat pumps meeting or exceeding 15 SEER, 12.5 EER and 8.5 HSPF.

If you are eligible to claim credit for qualified HVAC equipment, you should retain a copy of this certificate as part of your taxpayer's records, along with your receipt of purchase and installation. Please consult your professional tax advisor to determine what qualifies for a tax credit in your individual situation.

This letter certifies that the Mitsubishi Electric VSMS systems listed below meet or exceed the energy efficiency criteria to qualify for the tax credit as described in the American Recovery and Reinvestment Act of 2009, continued by the American Taxpayer Relief Act of 2012 and the tax extenders in December 2014 and in December 2015. These renewed tax credits are available for qualifying HVAC systems installed between January 1, 2015 and December 31, 2016. The energy efficiency requirements for qualification for the tax credits are as follows:

System Type	Efficiency Requirements		System Type	Efficiency Requirements
Split-system Air Conditioners	SEER ≥ 16 EER ≥ 13		Split-system Air-source Heat Pumps	SEER ≥ 15 EER ≥ 12.5 HSPF ≥ 8.5

The systems listed below are Qualified Energy Property for the tax credit allowed under § 25C:

Mitsubishi Variable Speed Mini-split System (VSMS) Air Conditioners
